

Classroom-Level Reporting in Pearson Access Quick Reference Card

Classroom-Level Reporting in Pearson Access

A variety of reports are available to view results Bridging Diagnostics, FAST, Benchmarks and selected historical data. Reports are available from three locations: within a session, the Reports area and in Report Builder. This document covers Sessions and Report area reporting.

What Data is Available Where?

Reports in Pearson Access are available from three different areas. Due to the source of both the assessment files and data, as well as the variation in data on various assessment types, where you can run each assessment type varies. Currently available historical data includes Access, PSAT 8-9, PSAT-MNSQT, ACT, SAT and AP.

	Sessions	Reports	Report Builder
BDA	X		X
Benchmark 1	X	X	X
FAST	X		X
Historical			X

Accessing Reports Available for a Session

The reports available within a session are designed for teachers to quickly view results for students within a session. Any student with a status of 'Report Ready' for an assessment can be viewed in a report. For tests with constructed response items, hand scoring must be completed for a student before their results are available for reporting.

To select a session for reporting:

1. Click **Sessions** in the left navigation bar

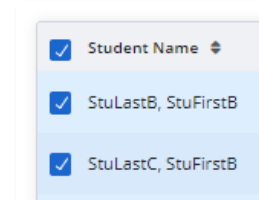

Note: The Organizations link in the upper-right must have a school selected in order to see the Sessions link (not the district, area or cluster).

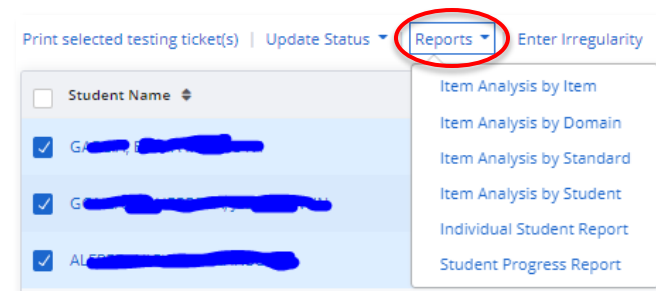

2. Click the session name

If needed, use the search box in the upper right to locate the session by name.

3. You can select all students by checking the box next to the Student Name column header, or individually select students to include in the report

4. Once you select at least one student, the **Reports** link appears and you will be able to select the report of your choice

Classroom-Level Reporting in Pearson Access

Session-Level Reports

A number of features are available across multiple types of session-level reports:

- You will see a confirmation message that you have successfully run the report and, if applicable, a message that some selected students do not yet have data available: click **x** next to a message if you want to remove it from the screen

Item Analysis Report By Item

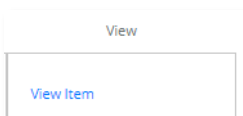

SUCCESS. Displaying report(s) for 1 student(s)

WARNING. Reports are not yet available for 2 out of 3 students in your selection

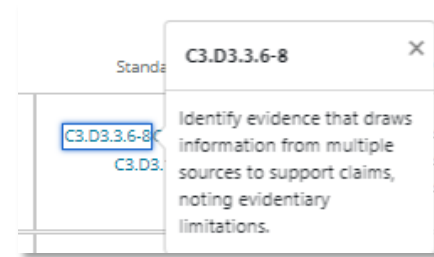

- To return back to the session from a report, click **Session Info**
- To create a PDF of the report, click **Download Report** (on some reports you will first have to select the students to include by checking their names)
- Where available, click the person icon to view a list of students indicated in the parentheses

Points Earned / Points Possible	Class Breakdown
0 / 4	53% (11)
1 / 4	14% (3)
2 / 4	33% (7)

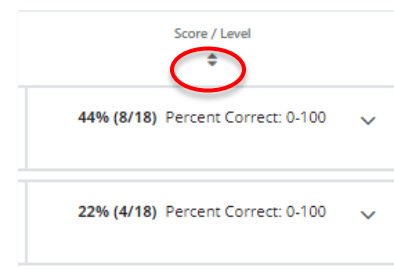

- Where available, click **View Item** to see the prompt, possible standards and associated passage, if applicable

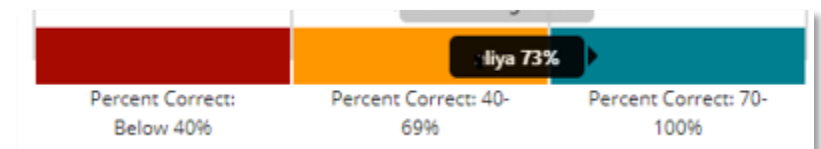

- Where available, click a standard to view the full text

- Sorting by column is available wherever you see the  icon; click again to sort in reverse order

- Several Benchmark reports include performance levels which are intended to enable a quick visual comparison and are not designed to be predictive in any way; they solely indicate that a score (or score average) falls within the indicated score ranges

Classroom-Level Reporting in Pearson Access

Item Analysis by Item

The Item Analysis by Item Report displays the number of students by earned point value per item. Use to identify which items were most difficult for students.

Item ID	Domain	Standard	Points Earned / Points Possible	Class Breakdown		
RE009328401	Reading Literature	RL.5.2	0 / 2	25% (7)		View Item
			1 / 2	54% (15)		
			2 / 2	21% (6)		
RE009334673	Reading Literature	RL.5.3	0 / 2	17% (5)		View Item
			1 / 2	36% (10)		
			2 / 2	47% (13)		

In the Class Breakdown column, you can view both the percent and number of test takers in the class by points earned. Click a standard ID to view the full text, and click **View Item** to see the item content.

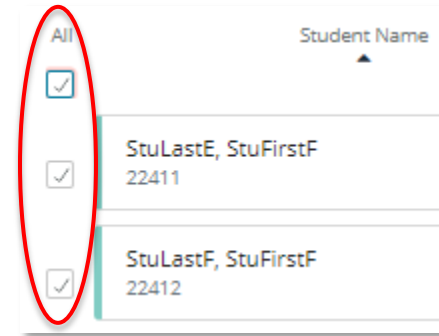

Item Analysis by Standard and Item Analysis by Domain

The Item Analysis by Standard groups items by standard and is useful for comparing performance on items aligned to the same standard. The Item Analysis by Domain groups items by domain; use to compare performance on items within the same domain. Both reports are similar to the Item Analysis by Item.

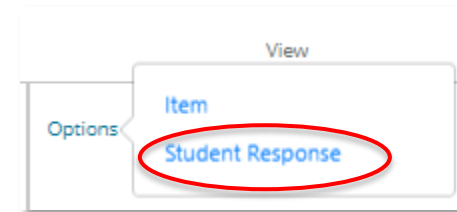

Standard	Item ID	Points Earned / Points Possible	Class Breakdown		
RL.5.2	RE009328401	0 / 2	25% (7)		View Item
		1 / 2	54% (15)		
		2 / 2	21% (6)		
	RE009354536	0 / 2	72% (20)		View Item
		1 / 2	7% (2)		
		2 / 2	21% (6)		

Item Analysis by Student

Use this report to view the percent correct per student. On this report, the **Download Report** button is not available until you select one or multiple students to include in the file.

- For any student, click the **V** icon to view item level detail for that student; in the detail, click Options > Student Response to see both the item content and what the student answered

What does '-ES' in an Item Number Mean?

An '_ES' after an Item ID indicates that there is a separate Spanish version of the item. When you see two items with the same beginning number but one having _ES one is the English and one is the Spanish version.

Classroom-Level Reporting in Pearson Access

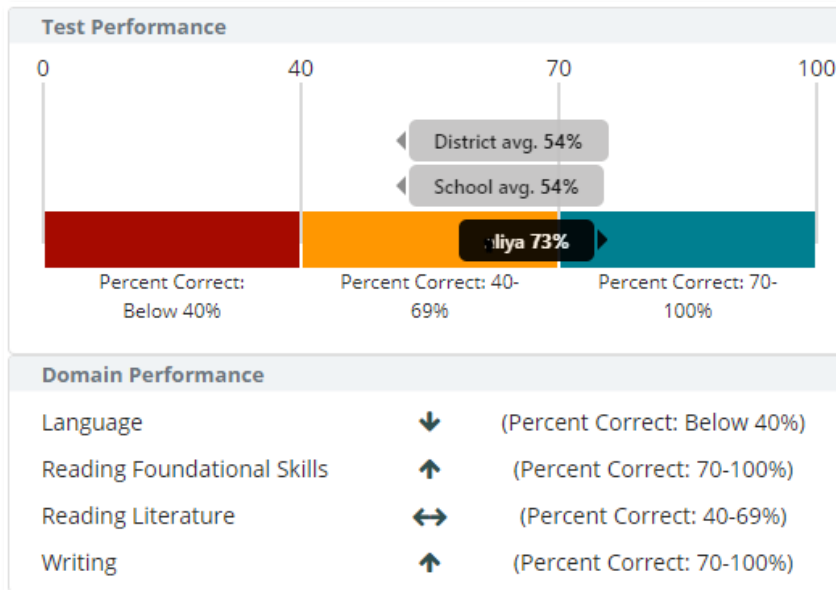

Session-Level Individual Student Report

Use the Individual Student Report to view percent correct by student and compare each student's performance with their peers.

- Expand any student to view details using the v icon to view details for that student

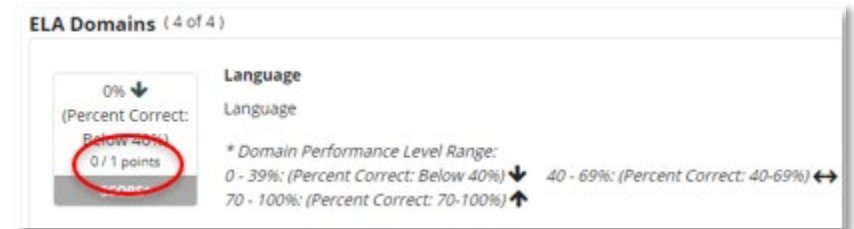

Student Name	3	Grade 03 RELA	10/14/2020	N/A	73% (22/30) Percent Correct: 70-100%	⌵
--------------	---	---------------	------------	-----	--------------------------------------	---

- You can compare how this student did compared to the school and district averages

Below the bar chart, the Domain Performance area uses arrow icons as a visual indicator of which score group the falls in per domain.

Below the Domain Performance area, view the points achieved out of points possible per domain.

Session-Level Student Progress Report

This report is designed to show progress over time across at least two assessments in the same category (e.g., FAST or Benchmark). When you run this report from an assessment for which students have results for other assessments in the same category, all tests are displayed automatically for comparison.

The key at the top of the report shows the colors represented by each score range. Note that retakes do not apply to interim assessments.

Below the key, view overall results per student and test.

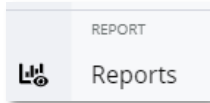

All	Student Name	Grade	Test 1	Test 2
<input type="checkbox"/>	StuLastA, StuFirstB 22277 Most Recent Test Date: 10/28/2019	4	Math Interim 1(2019-2020) 36% (8 / 22) Test Date: 10/28/2019	Math Interim 2(2019-2020) 52% (11 / 21) Test Date: 01/16/2020
<input type="checkbox"/>	StuLastB, StuFirstB 22278 Most Recent Test Date: 10/28/2019	4	Math Interim 1(2019-2020) 77% (17 / 22) Test Date: 10/28/2019	Math Interim 2(2019-2020) 57% (12 / 21) Test Date: 01/16/2020

Additional Options for Benchmark Assessments

For the Benchmark category, view session reports from an overview screen that allows for comparison among numerous student sets.

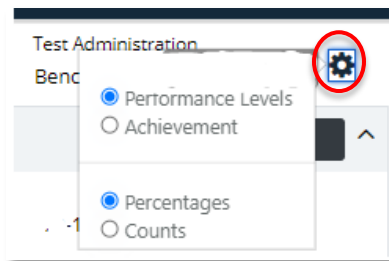

1. In the left navigation column, click **Reports**

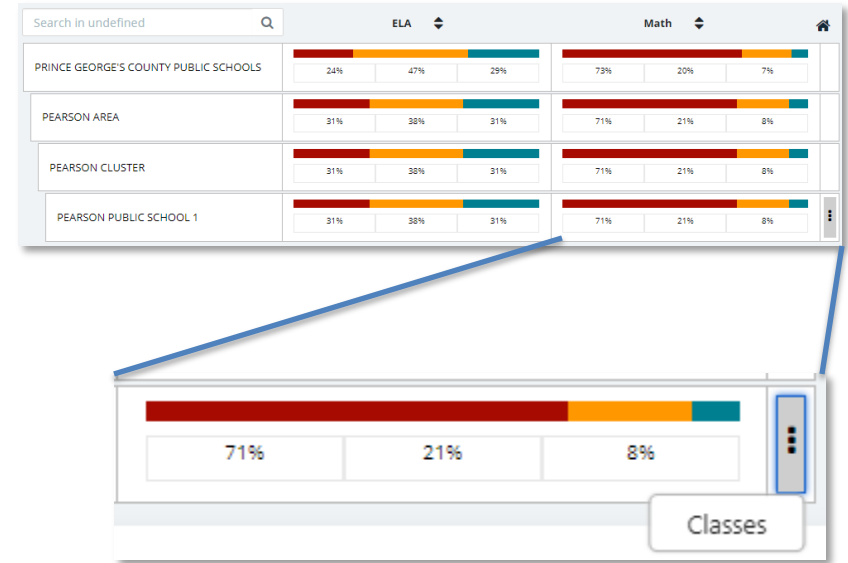

2. In the new browser tab which opens, select the current school year and then the assessment type

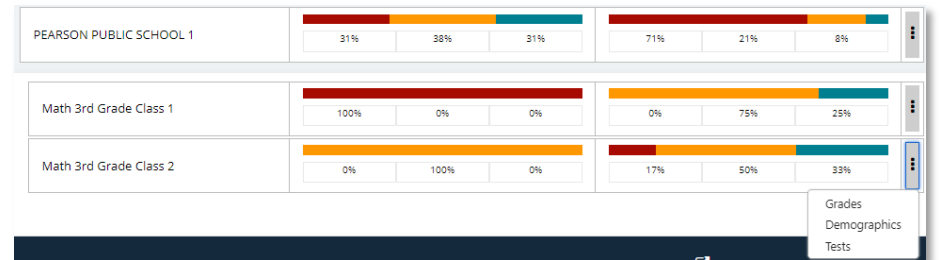

3. Optionally, click the gear icon in the top right of the screen to adjust how the report displays

4. In the school level row, for either the Math or ELA column, click the ellipsis and select 'Classes'

All classes for which student results are available are displayed below the school row. You can view results for a class by grade, demographics or test using the ellipsis in a class row. To 'drill down' in another class, select 'Classes'; from the school level row.

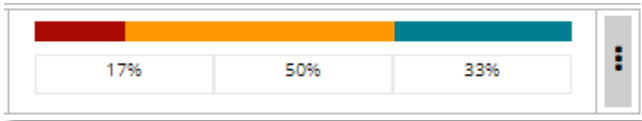

Classroom-Level Reporting in Pearson Access

- At any time, click the **Home** icon on the summary to clear filters and return to the default view

- Click the bar chart to view the number of students represented in each score range

When clicking from a class- or test-level row, there is an additional link to **Performance Details**.

Math 3rd Grade Class 2, Math

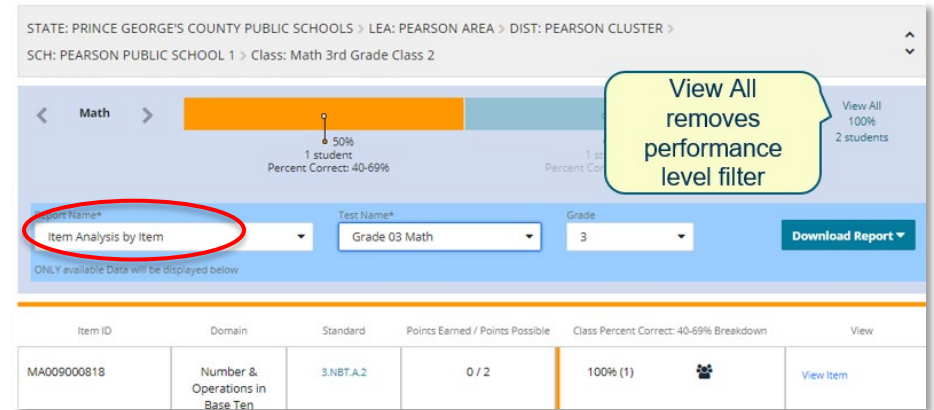

- Percent Correct: Below 40%** 17% (1 students)
- Percent Correct: 40-69%** 50% (3 students)
- Percent Correct: 70-100%** 33% (2 students)

[View Performance Details](#) Total 6 students

Alternatively, click one of the numbers below the bar chart to skip the pop-up window and jump straight to Performance Levels.

- In the Performance Level view, see results for all students or only those within one score range

Pick a report type from the menu provided.

STATE: PRINCE GEORGE'S COUNTY PUBLIC SCHOOLS > LEA: PEARSON AREA > DIST: PEARSON CLUSTER >
SCH: PEARSON PUBLIC SCHOOL 1 > Class: Math 3rd Grade Class 2

Math > 50% 1 student Percent Correct: 40-69%

Report Name* Test Name* Grade
Item Analysis by Item Grade 03 Math 3

Download Report

Item ID	Domain	Standard	Points Earned / Points Possible	Class Percent Correct: 40-69% Breakdown	View
MA009000818	Number & Operations in Base Ten	3.NBT.A.2	0 / 2	100% (1)	View Item

When you pick a report type from this screen, the displayed report functions the same as if generated from the **Sessions** tab as described earlier in this document.

When you run a Student Progress report, the top portion of the screen continues to reflect the assessment selected.
